

## Photo Capture & Printing for Activity Venues

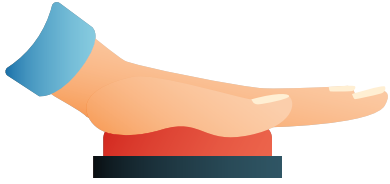

### Add More Value to Your Guest Experience

DNP's Action Capture system expands your guest experience with the fun of a candid photo. Place the DNP camera module at a special location and angle to make it easy for guests to get a truly unique photo that cannot be captured using their cell phone. Your guests will get a great takeaway from their event that they can share with others, with a strong tie to your brand!

# How it Works

1.

During the activity, the guest presses a button to activate the camera

2.

Images are transferred to the control unit.

3.

Images are printed from the control unit. (can print automatically or can be curated)

4.

Optional photo slide show for event attendees (TV monitor not included)
