

Compact Speed and Quality Make the DNP DS620A™ the Photo Printer of Choice for Chic Booth

“Customer satisfaction is the cornerstone of my business. I had to find a printer that could meet the quality expectations of my customers, I was willing to invest more money on a DNP printer, because I knew the quality was there.”

Sitou Byll-Cataria started Chic Booth in Jacksonville, Florida, in 2015 with one goal in mind: to provide a premium photo booth experience for their clients. Now a local leader in luxury photo booth rentals, Chic Booth relies on exceptional quality and personalized service to maintain its reputation for business growth.

“A majority of our business comes from corporate events, some of our clients include: Mercedes, Lexus, and Ritz-Carlton,” said Sitou. “They appreciate the quality and professionalism that we provide. The customer experience is everything for us. We spend a lot of time analyzing our client's needs before an event.”

Prior to starting his photo booth business, Sitou thoroughly researched the different professional, high quality, compact, dye-sublimation printers available.

“Customer satisfaction is the cornerstone of my business. I had to find a printer that could meet the quality expectations of my customers,” said Sitou. “I was willing to invest more money on a DNP printer, because I knew the quality was there.”

At only 10.8-inches wide by 14.4-inches deep by 6.7-inches high, the DNP DS620A was a perfect fit for his photo booth company because of its compact size and ease of portability.

“Events can be unpredictable,” said Sitou. “Sometimes my staff will have to carry the booth far distances, and with a heavier printer, there is a greater potential for injury. The DNP DS620A is small, light, and very portable.”

Despite its compact size, the DS620A provides the fastest print speeds available for the professional photography market — standard 4x6” images are produced in less than nine seconds, while 5x7” images are printed in approximately 15 seconds. Commenting on the printer speed, Sitou said, “Our number-one reason for choosing the DS620A was its speed. We just couldn’t afford to have customers waiting and delaying the workflow.”

Sitou also admires the versatility of the DS620A, giving his clients greater variety in their print size options, including 2x6” (2-up) photo strips, 2x6” (4-up) photo strips, 3.5x5” (2x), 4x6”, 4x6” (2x), 5x7”, 6x8”, 5x5”, and 6x6” square prints, as well as new panoramic 6x14” and 6x20” prints. Users also have the option of choosing between glossy, matte, and luster finishes.
