DNP Showcases Flagship DS620A™ Dye-sublimation Photo Printer at IAAPA 2018

ORLANDO, Florida – DNP Imagingcomm America Corporation (DNP IAM) will be showcasing its flagship DS620A dye-sublimation professional photo printer. Part of DNP's award-winning line of DS Series printers, the DS620A is the world's most compact professional-grade photo printer and can produce up to 400 prints per hour. Perfect for ride photo systems and other attractions, the DS620A is a highly profitable solution for amusement and attractions professionals that want to provide instant custom photo souvenirs.

At only 10.8-inches wide by 14.4-inches deep by 6.7-inches high, the small footprint allows for easy transportation and stacking with additional printers for high output functionality of making it the ideal companion for attractions and photographers searching for mobility, print speed, and volume. The printer's design also features improved aesthetics with a new white color scheme and rounded corners.

The DS620A is capable of producing 2x6" (2-up) photo strips, 2x6" (4-up) photo strips, 3.5x5" (2x), 4x6", 4x6" (2x), 5x7", and 6x8" prints as well as new 5x5" and 6x6" square prints. Not only is the printer versatile, but it also boasts a 14 percent increase in image throughput per hour for some of the fastest print speeds available—standard 4x6" images are produced in less than nine seconds, while 5x7"s are printed in about 15 seconds. The printed media will also feature a new DNP watermark on the backside of each photo.

Environmentally friendly, both energy consumption and media waste have been optimized in the DS620A. A new standby mode lowers idle time energy costs and increases profitability by making the most efficient use of energy (<0.5W). The printer also provides advanced status information from the driver, enabling users at any time to check remaining print media, media format, printer status, printer life print counter, color control data, firmware version, and serial number.

"With its wide range of print size options, quick output, and innovative print technology, the DS620A is a revenue-generating asset for roaming photographers printing on-site as well as souvenir stations at attractions," said Shinichi Yamashita, President of DNP IAM. "The DS620A represents our continued commitment to providing the attractions industry with the most reliable and cost-effective printing solutions available as well as our dedication to preserving their customers' memories."

The DS620A printer drivers are available for Windows 7, Windows 8, and Windows 10 in addition to the Mac OS-X Driver for 10.8 and higher. DNP also supports the efforts of system integrators using DNP photo printer in their applications.

About DNP Imagingcomm America Corporation (DNP IAM)

IAM is a 100 percent U.S. subsidiary of Dai Nippon Printing Co., Ltd. (DNP) – the world's largest manufacturer of dye-sublimation media for photo printers and thermal transfer ribbons and barcode printers.

DNP Imagingcomm America Corporation has the broadest selection of solutions for the photo retail market and products designed to address retailer's specific business goals and objectives—backed by the quality and reliability today's customers expect. Manufacturing, sales and development offices of dye-sublimation media for photo printers is located in Concord, NC, and more information is available at www.dnpphoto.com.

About DNP

DNP, founded in 1876, is the world's largest diversified printing/coating technologies company. At its 70 production plants, both in Japan and overseas, DNP's operations include commercial printing, packaging, decorative materials, electronics, business forms, and imaging products.

Over 25 years ago, DNP was one of the earliest organizations to pioneer dye-sublimation media—and the first company to start business development in thermal transfer ribbons. DNP has since grown to be the world's largest manufacturer of dye-sublimation media and thermal transfer ribbons. For more information, please visit www.dnp.co.jp/eng.
