**DNP's IDW500 ID and Passport Photo Solution
Wins NACDS Total Store Expo Product Showcase Award**

CONCORD, North Carolina — DNP Imagingcomm America Corporation today announced its IDW500 ID and Passport Photo Solution has been awarded the NACDS Total Store Expo Product Showcase Award. The awards, presented at the 2017 NACDS Total Store Expo and evaluated by retail attendees, recognize innovative and revenue-generating products for the retail industry.

"It is an honor to be selected as one of 11 winners at the 2017 NACDS Total Store Expo awards," said Katsuyuki Oshima, President of DNP Imagingcomm America Corporation. "This award reaffirms our commitment to providing the retail industry with solutions that increase productivity, flexibility and profitability, just like the IDW500 ID and Passport Photo Solution."

The IDW500 is a complete image capture and printing system that includes DNP's Photo ID printer, digital camera with wireless transfer, system console, and ID photo media. The system is designed to produce passport and ID photos that are automatically evaluated biometrically and formatted to comply with government requirements for the USA and many other countries' passports and visas, eliminating rejections and keeping customers happy.

The system's touchscreen mini console has a 6.8-inch display and software that allows operators to quickly view, select, edit, and print pictures. The system's digital camera is configured for swift and reliable wireless transfer to the system console. The system image processing performs eight different biometric checks on all images, presenting the result to the operator for printing. The automatic functions of the system eliminate the need for manual adjustment and reduce the risk of operator error. The IDW500 software also creates a gallery of the past six captured images, allowing for easy reprints, or changing the ID template without taking another picture.

This comprehensive solution results in a solid workflow for faster production with consistent, high quality results. Customers also have the added choice to also output their images to USB stick for digital delivery.

About Imagingcomm America Corporation (IAM)

IAM is a 100 percent U.S. subsidiary of Dai Nippon Printing Co., Ltd. (DNP) – the world's largest manufacturer of dye-sublimation media for photo printers and thermal transfer ribbons and barcode printers.

DNP Imagingcomm America Corporation has the broadest selection of solutions for the photo retail market and products designed to address retailer's specific business goals and objectives—backed by the quality and reliability today's customers expect. Manufacturing, sales and development offices of dye-sublimation media for photo printers is located in Concord, NC, and more information is available at www.dnpphoto.com.

About DNP

DNP, founded in 1876, is the world's largest diversified printing/coating technologies company. At its 70 production plants, both in Japan and overseas, DNP's operations include commercial printing, packaging, decorative materials, electronics, business forms, and imaging products.

Over 25 years ago, DNP was one of the earliest organizations to pioneer dye-sublimation media—and the first company to start business development in thermal transfer ribbons. DNP has since grown to be the world's largest manufacturer of dye-sublimation media and thermal transfer ribbons. For more information, please visit www.dnp.co.jp/eng.
