WPS-1 Wireless Print Server Wins Inaugural PMA Out of the Box Award

CONCORD, North Carolina — DNP Imagingcomm America Corporation today announced its WPS-1 Wireless Print Server has been awarded the 21st Century George Eastman PMA Out of the Box award. The awards, presented at the 2015 InnovationNow: Photo Business and Technology Summit, recognize innovation and collaboration behind breakthrough achievements across the professional photo and photo retail industries.

“It is a true honor to be selected as one of the Out of the Box award winners at the inaugural PMA InnovationNow summit,” said Katsuyuki Oshima, President of DNP Imagingcomm America Corporation. “This award reaffirms our commitment to providing the photography industry with solutions that increase productivity, flexibility, and profitability as well as our continued partnerships with many of the industry’s leading brands.”

DNP’s WPS-1 Wireless Print Server allows event photographers, photo booth operators, and small photo retail operators to efficiently increase their workflow productivity by eliminating the use of wires and memory cards. The WPS-1 provides direct printing capability to DNP’s DS Series of professional dye-sublimation photo printers from Wi-Fi enabled photo capture devices, mobile devices and personal computers as well as a host of third party products, such as Simple Booth and CamRanger.

The compact set-top box runs proprietary DNP software to eliminate typical PC and network router requirements while also supporting multiple image input methods. Using its built-in 802.11b/g/n Wi-Fi access point, the unit supports printing from multiple Wi-Fi enabled DSLR cameras, iOS and Android smartphones/tablets, and Android-based cameras, as well as printing from Windows or Mac computers. Users can also select and print groups of photos using tablets running iOS, Android, or Windows.

Additionally, the WPS-1 can connect to two identical DNP photo printer models for speed/redundancy or connect to two different models for an increased range of print size options. The device allows for multiple print sizes including 4x6”, 5x7”, 6x8” and 8x10”, depending on the combination of printers and media. All prints are available with glossy/matte finishes and can be produced with custom borders as well.

About Imagingcomm America Corporation (IAM)

IAM is a 100 percent U.S. subsidiary of Dai Nippon Printing Co., Ltd. (DNP) – the world’s largest manufacturer of dye-sublimation media for photo printers and thermal transfer ribbons and barcode printers.

DNP Imagingcomm America Corporation has the broadest selection of solutions for the photo retail market and products designed to address retailer's specific business goals and objectives—backed by the quality and reliability today's customers expect. Manufacturing, sales and development offices of dye-sublimation media for photo printers is located in Concord, N.C., and more information is available at www.dnpimagingcomm.com.

About DNP

Imaging Communications Operations is one of many of DNP's operations. Over 25 years ago, DNP was one of the first organizations to pioneer dye-sublimation media -- and the oldest company to start business development in thermal transfer ribbons. DNP has since grown to be the world's largest manufacturer of dye-sublimation media and thermal transfer ribbons.

DNP group is also the world's largest diversified printing/coating technologies company. At its 71 production plants, both in Japan and overseas, DNP's operations include commercial printing, packaging, decorative materials, electronics, business forms and information media supplies. DNP is a global corporation with \$15.4 billion* in annual revenue. For more information, please visit www.dnp.co.jp/eng
