Print Wirelessly from DNP Photo Printers with The New Wireless Connect Module from DNP

Concord, NC – June 9, 2020 – DNP Imagingcomm America Corporation’s (DNP IAM) today announced the launch of its new Wireless Connect Module (WCM). The WCM takes all of DNP’s award-winning photo printers to the next level by allowing users to wirelessly print photos directly from any iOS or macOS device on the network. Wireless printing makes it easy for professional photographers, photo booth operators and event photographers to connect and print quickly on-location or in the studio.

The WCM works with AirPrint® to allow iOS apps to print to DNP printers with no special printing app required. Photographers can easily set up and configure the device through an admin page that can be accessed via a web browser. Users can select print sizes, number of copies and send photos to multiple printers. Unlike other wireless tools, the WCM ensures images do not print stretched or distorted.

“We are thrilled to bring additional wireless printing capabilities to our photo printers and to our customers,” says Shinichi Yamashita, President of DNP Imagingcomm America Corporation. “The functions of the Wireless Connect Module are designed for all of our customers, from professional photographers working in their studios to photo booth operators who are always on the road. With the new Wireless Connect Module, customers will be able to expand their services for their clients and increase revenue with the touch of a button.”

The WCM supports all DNP printers, meaning that it is a great addition to any DNP printer photographers already know and love, and it can connect to multiple printers to allow for even faster output. DNP’s award-winning photo printers deliver beautiful, high-quality prints quickly and easily. DNP printers use innovative dye-sublimation print technology to produce photos that do not smudge and that stay vibrant over time, making them perfect for every type of photographer in the industry.

About DNP

DNP, founded in 1876, is the world's largest diversified printing/coating technologies company. At its 76 production plants, both in Japan and overseas, DNP's operations include commercial printing, packaging, decorative materials, electronics, business forms, and imaging products. Over 25 years ago, DNP was one of the earliest organizations to pioneer dye-sublimation media—and the first company to start business development in thermal transfer ribbons. DNP has since grown to be the world's largest manufacturer of dye-sublimation media and thermal transfer ribbons. For more information, please visit www.dnp.co.jp/eng.
