DIGITAL PHOTO PRINTER
DP-DS820
DP-DS820 (A)

Printer Driver User's Manual

For Windows 7, 8, 10
● Safety precautions
Before you use the printer, carefully read the User's manual to ensure that you use the printer correctly. Be aware that the content complies with the standards at the time the User's manual section related to safety, including usage and safety precautions, was created.

● Modifications
For product safety, it is prohibited to modify the DP-DS820/DP-DS820 (A) printer, DP-DS820/DP-DS820 (A) printer driver, and CD contents.

● Copyright
The copyrights, trademark rights, and other intellectual property rights related to documents and programs included with this product are the property of Dai Nippon Printing Co., Ltd. and other rights holders. You cannot copy and use these items without the permission of Dai Nippon printing Co., Ltd. except where permitted by applicable laws.

---

Main additional functions from previous models:

- **Add Rewind Print function (limited to applicable countries)**
  The Rewind Print function reduces consumption of the ribbon for the sizes (8x4), (8x5), (8x6), and A5 Format.
  For details, see "The rewinding print function" in 2.2.2 Advanced options.

- **Added printer information**
  Added a printer information function to display, for example, printer information and the status/number of printable copies on the driver screen.
  For details, see 2.2.6 Printer information.

- **Added language settings**
  Added a function to change the display language for the following print settings: Advanced options-Printer functions, Option, Color Adjustment, and Printer Info.
  For details, see 2.2.4 Option.
Chapter 1  Installation

Installation procedure

The installation procedure is made up of three steps. The details of each step are explained below.

Step 1  Prepare the printer and computer → "1.1 Prepare the printer and computer"

At this point, the USB cable is not yet connected.

Step 2  Install the driver package → "1.2 Install the driver package"

Insert the included CD into the disk drive, and then install the driver package.

Step 3  Install the printer driver → "1.3 Install the printer driver"

Connect the USB cable, switch on the printer, and then install the printer driver. After installation is complete, restart the computer.
1.1 Prepare the printer and computer

Make sure that the printer power is off. Prepare a USB cable. However, do not use the USB cable to connect the printer and computer at this time.

Log in to Windows as an administrator. The following explanation presumes that the operations are carried out with administrator privileges.

**CAUTION:**

The display settings of the computer must be set as follows. If the settings differ from the following, the printing preferences screen and other items may not fit in the display area.

- Resolution: At least 1280x800
- Size of text and other items (DPI): 100%

1.2 Install the driver package

Insert the included CD into the disc drive. Open Windows Explorer, and then click the corresponding drive. (If AutoPlay is enabled, select Open folder to view files using Windows Explorer.)

(If AutoPlay is enabled in Windows 8 and 10, a message appears stating “Tap to choose what happens with this disk”. Click the message and select “Open folder to view files Windows Explorer”)

Select one of the following folders on the included CD. *Select the folder for your usage environment.

CD drive:\\DP-DS820_Driver

Figure 1.2.1 Driver Package folder
In the selected folder, double click the following file: DriverInstall.CMD. (Depending on your usage environment, the .CMD extension may not be displayed.) The driver package installer appropriate for your operating system (32-bit or 64-bit) is selected automatically.

When you start the installer, a window appears for selecting the language that will be used during the installation. After you select the language to use, click “OK”.

Click “Next >” when the Installation Wizard screen appears.
Click “Install” when the installation is ready.

![Installation start confirmation screen](image1)

**Figure 1.2.5 Installation start confirmation screen**

When the installation starts, a screen appears that shows the installation status.

![Installation status screen](image2)

**Figure 1.2.6 Installation status screen**
When a User Account Control dialog box appears, click Yes.

![User Account Control dialog box]

Figure 1.2.7 User Account Control

Click "Install" when the Windows Security confirmation display appears.

![Windows Security confirmation]

Figure 1.2.8 Windows Security confirmation

Installation of the driver package starts. Wait until installation finishes. Click “Finish” when the Installation Wizard completion screen appears.

![Installation Wizard completion screen]

Figure 1.2.9 Finish of Installation Wizard
1.3 Install the printer driver

Use the USB cable to connect the printer and computer, and then switch on the power of the DP-DS820 printer. After the printer is recognized, installation of the driver starts.
*For the connection, see the User's manual of the DP-DS820.

If driver installation starts, the following message appears in the taskbar: “Installing device driver software”. In Windows 8 and 10, this message does not appear. Proceed to page 7.

![Driver installation message](image)

If you click on this message, the Install driver software screen appears and displays the installation status of the driver. If Close is clicked, this screen closes.

![Installing the driver software](image)

*About the “Skip obtaining driver software from Windows Update” option
If your operating system is configured to obtain driver software from Windows Update, it may take time for installation to complete because the process searches for drivers from Windows Update first. You can reduce the time until the completion of installation by choosing to skip obtaining driver software from Windows Update. (Depending on your operating system, it may take some time until installation is complete.) From the Driver Software Installation dialog box, click “Skip obtaining driver software from Windows Update”.

![Option to skip obtaining driver software from Windows Update](image)
A confirmation dialog box appears. Click Yes.

![Confirmation to skip getting driver software from Windows Update](image1.png)

Figure 1.3.4 Confirmation to skip getting driver software from Windows Update

Soon after installation starts, a message appears in the taskbar stating “Your device is ready to use”, and then printer driver installation finishes.

![Installation complete message](image2.png)

Figure 1.3.5 Installation complete message

If you click on the message, the Driver Software Installation dialog appears, and the “Your device is ready to use” message appears. Click Close.

(If the Driver Software Installation screen is open when installation starts, the abovementioned taskbar message is not displayed.)

![Completion of driver software installation](image3.png)

Figure 1.3.6 Completion of driver software installation
Click "Start", and then click "Control Panel" to open the Control Panel.
In Windows 8, right click the Start screen. In the bottom right area, select All Apps, and then select Control Panel.
In Windows 10, right click the Start. and then click "Control Panel" to open the Control Panel.
In Control Panel, click "View devices and printers".

In Devices and Printers, make sure that “DP-DS820” is present.
Note: In Windows 8 and 10, when the printer is offline (the printer is not on and connected), the DP-DS820 icon is not displayed.
This completes installation of the DP-DS820 printer driver.

After the installation of the printer driver is complete, always restart the computer.
When it was not possible to install the DP-DS820 printer driver correctly, the following message appears in the taskbar: Device driver software was not successfully installed.

![Message indicating that the driver was not installed](image)

Figure 1.3.9 Message indicating that the driver was not installed

If you click on this message, the Install driver software screen appears and displays the message “Device driver software was not successfully installed”. Click Close.

(If the Driver Software Installation screen is open when installation starts, the abovementioned taskbar message is not displayed.)

When the driver could not be installed correctly, see the next section, 1.4, “Install drivers for unspecified devices”, and then install the printer driver.

![When the driver was not installed correctly](image)

Figure 1.3.10 When the driver was not installed correctly
1.4 Install drivers for unspecified devices

If you connect a printer that is on to the computer before installing the driver package, a device is created under “Unspecified” in Devices and Printers. In such a case, use the following method to install the printer driver.

Furthermore, use the following method to install the printer driver if you use the standard installation procedure (install the driver package, connect the printer, and then install the printer driver), but the driver is not installed correctly, and a device is created under “Unspecified”.

1. Install the driver package
   When the driver package has not yet been installed, install it by following the procedure in 1.2, “Install the driver package”.
   If you install the driver package, installation of the printer driver for the unspecified device completes it automatically.

2. Installing a driver for an unspecified device
   In Devices and Printers, under Unspecified, right click on “Photo Printer”. From the menu, click “Troubleshoot”.

![Figure 1.4.1 Photo Printer under Unspecified](Image)
The Install a driver for this device screen appears. Click "Apply this fix".
The computer searches for a driver automatically, and then installs it.

![Figure 1.4.2 Applying a fix](image)

If the driver is installed, the message "Troubleshooting has completed" appears. Click "Close the troubleshooter" to close the troubleshooting window.

![Figure 1.4.3 Completing troubleshooting](image)
In Devices and Printers, make sure that “DP-DS820” is present.

Note: In Windows 8 and 10, when the printer is offline (the printer is not on and connected), the DP-DS820 icon is not displayed.

This completes installation of the DP-DS820 printer driver.

![Devices and Printers screen](image)

**Figure 1.4.4 Devices and Printers screen**

After the installation of the printer driver is complete, always restart the computer.
Chapter 2 Properties

You can configure various printer settings from the Properties of the DP-DS820 driver. Make sure you understand the contents well before changing settings. To use the properties, log in as an administrator. Depending on the application you are using, you must perform this operation from the print settings of the application.

2.1 Open the printer properties

1. Click "Start", and then click "Control Panel" to open the Control Panel.
   In Windows 8, right click the Start screen, click "All Apps", and then click "Control Panel" to open the Control Panel.
   In Windows 10, right click the Start, and then click "Control Panel" to open the Control Panel.

2. From the Control Panel, click "View devices and printers" to open the Devices and Printers screen.
3. Right click "DP-DS820" icon. From the menu, click "Printer Properties" to open the Properties dialog box.
   **Note:** In Windows 8 and 10, when the printer is offline (the printer is not on and connected), “DP-DS820” icon is not displayed.

4. The DP-DS820 Properties screen appears.
2.2 Print settings functions

If you select the basic settings from the Properties screen, you can change various print settings.

2.2.1 Layout

Orientation

Set the print orientation to "Portrait" or "Landscape". For details, refer to "2.6 Orientation".

Page Order

In the application, specify the order when multiple copies of an image are printed.

Example) Print order

Front to Back

Back to Front

Page Format

Pages per Sheet

Set printing of the specified division size. In most situations, set “1”.

Example) Division size

1 division

4 divisions

9 division
2.2.2 Advanced options

If you select "Advanced..." on the Layout tab, you can configure various advanced options.

![Figure 2.2.2.2 Advanced options tab](image)

![Figure 2.2.2.1 Advanced settings](image)

Paper/Output

Paper Size

Specify the paper size. The paper size that can be specified depends on the media size that is loaded in the printer. If the printer is offline, the loaded media size is assumed to be A4. Multiple layout will be automatically used depending on the specified paper size.

For details, see <Multiple layout> described later.

<table>
<thead>
<tr>
<th>Loaded media size</th>
<th>Specifiable paper size</th>
<th>Multiple layout</th>
</tr>
</thead>
<tbody>
<tr>
<td>8x10（*1）</td>
<td>8x4, 8x5, 8x6, [8x10]</td>
<td>Enable</td>
</tr>
<tr>
<td>8x12（*1）</td>
<td>8x4, 8x5, 8x6, [8x12]</td>
<td>Disable</td>
</tr>
<tr>
<td>A4（*2）</td>
<td>A5 Format, 8x4, 8x5, [A4 Format], 8x6, 8x8, 8x10</td>
<td>Disable</td>
</tr>
</tbody>
</table>

The paper size in square brackets [ ] is the default paper size for the loaded media.

*1: Paper sizes that cannot be used for printing are grayed out.

*2: For paper sizes that can create margins on the sides of the output results, a warning appears.

![Figure 2.2.2.3 Incompatibility media size](image)

(Gray out indication)

![Figure 2.2.2.4 Incompatibility media size](image)

(Warning indication)
Copy Count
You can specify the number of copies to be published for images.

Graphic
Print Quality
Specify the resolution.

<table>
<thead>
<tr>
<th>Print Quality</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>High-speed</td>
<td>Print using high speed mode</td>
</tr>
<tr>
<td>High-quality</td>
<td>Print using high quality mode</td>
</tr>
</tbody>
</table>

ICM Method

<table>
<thead>
<tr>
<th>ICM Method</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICM Disabled</td>
<td>Synchronized with &quot;Color Adjustment Disabled&quot; in the 2.2.4 Option.</td>

<td>Synchronized with &quot;Color Adjustment ICM&quot; in the 2.2.4 Option. Manage colors using the driver.</td>
</tr>
<tr>
<td>ICM Handled by Printer</td>
<td>When this item has been selected, operation is the same as &quot;ICM Handled by Host System&quot;.</td>
</tr>
</tbody>
</table>

ICM Intent
Set the rendering method when using ICM. For the ICC profile, always set to "Pictures". Do not use other settings.

Document Options

Advanced Printing Features
Always set Enable. Do not use other settings.

Pages per Sheet Layout
Set the layout direction of an image when the Pages per Sheet setting is set for multiple divisions.

Printer Features

Border
Synchronized with Border in the Option.

Overcoat Finish
Set the overcoat finish method for the surface of printed items from the following four types.

<table>
<thead>
<tr>
<th>Overcoat Finish</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glossy</td>
<td>Create an item with a glossy finish.</td>
</tr>
<tr>
<td>Luster</td>
<td>Create printouts with rough surface and semi-gloss finish that has less glare.</td>
</tr>
<tr>
<td>Matte</td>
<td>Create an item with a matte finish.</td>
</tr>
<tr>
<td>Fine Matte</td>
<td>Create printouts with fine grain and strong matte finish.</td>
</tr>
</tbody>
</table>
Print Re-try
Specify whether to print data in the printer buffer after a printer error has been cleared.

<table>
<thead>
<tr>
<th>Print Re-try</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disable</td>
<td>Clear the print data in the printer buffer when a printer error occurs. You must send the cleared print data again after the error is cleared. When you use an application with an error recovery function, select this option.</td>
</tr>
<tr>
<td>Enable</td>
<td>Save print data in the printer buffer when an error occurs. The printing process is restarted from the saved data after the error is cleared. Note that if the power is switched off, the data is not saved.</td>
</tr>
</tbody>
</table>

Depending on the printer error, print data in the printer buffer will be cleared, regardless of the Print Re-try setting.

The following section shows the operation for each Print Re-try setting by error.

<table>
<thead>
<tr>
<th>Error content</th>
<th>When Print Re-try is disabled</th>
<th>When Print Re-try is enabled</th>
</tr>
</thead>
<tbody>
<tr>
<td>Paper end</td>
<td>You must send the unprinted image data again after the error is cleared.</td>
<td>The printing process is restarted from the data saved in the printer buffer after the error is cleared. When the paper initialization operation is to be carried out, printing occurs afterwards.</td>
</tr>

<td>2</td>
</tr>
</tbody>
</table>

Multiple layout is carried out under the following conditions.
1. Set the paper size of the printer driver to one of the abovementioned paper sizes.
2. Send multiple images from the application. (*2)

Note)
*1 : Margins can be created on the sides of the output results.
*2 : Depending on usage, rewind printing may be used instead of multiple layout printing.
Because they are carried out by the print job, multiple layout are carried out when there are multiple images in a single job.
If you want to layout the same image, send the same number of images as the number-of-sheets setting.
The printer prints two or three screens worth of images at one time and cuts the paper to the set size when the paper is ejected.

Multiple layout patterns>
The following combinations are possible for the multiple layout patterns.

- Same-size images on one sheet
  - Layout of 2 pictures
  - Cut when paper is ejected

- Same-size images on one sheet
  - Layout of 3 pictures
  - Cut when paper is ejected
<The rewinding print function>
This function performs optimal printing that controls ribbon consumption when printing 8x4 and 8x5 size prints on 8x10 size media.

In the same manner, it also performs optimal printing that controls ribbon consumption when printing 8x4, 8x5, and 8x6 size prints using 8x12 size media, and A5 Format, 8x4, and 8x5 size prints using A4 size media.

The above operation applies only to the DP-DS820. The DP-DS820 (A) performs printing without rewinding the ribbon.

The following shows the difference in ribbon consumption when (8x4) is specified for the paper size setting for 8x10 size media.

<table>
<thead>

<td>*After the first sheet is printed, the ribbon is rewound, and the second and following sheets are printed. Furthermore, after the third sheet is printed, the ribbon is rewound and adjusted to the next print position.</td>
<td>*For the second and third sheets, two sheets are printed at the same time in a multiple layout.</td>
</tr>
</tbody>
</table>
<Application usage example>
This usage example uses Windows Explorer.

Step 1. In Windows Explorer, select two or more pictures.

Step 2. Select "Fit picture to frame" check box, and then click "Options...".

Step 3. Click "Printer Properties...".

Step 4. Set the Orientation to Portrait, and click "Advanced...".

Step 5. Set the paper size to the setting of the multiple layout. Click OK twice to close the dialog boxes in Step 5 and 4.

Step 6. Click the Print button.
2.2.3 Paper/Quality

![Figure 2.2.3 Paper/Quality tab](image)

**Color**  Set Color. Do not use black and white.

2.2.4 Option

![Figure 2.2.4.1 Option tab](image)
![Figure 2.2.4.2 Sharpness setting](image)

**Border**  Specify a border for printing. (Select the check box for a border.) Synchronized with Border Enable/Disable in the Advanced settings.
Sharpness
Process sharpness using one of the 11 stages (Figure 2.2.4.2). If the setting is “0 (Default)”, sharpness is not processed.
Moving to the minus (-) side blurs the image and moving to the plus (+) side sharpens the image.

Color Adjustment
None
Synchronized with the ICM Method in the Advanced settings. If this check box is selected, ICM is disabled, the Color adjustment tab is also disabled, and the printer driver does not carry out color adjustment.
Handled by Driver
If this check box is selected, ICM is disabled, and the 2.2.5 Color Adjustment is enabled. The result is applied to the adjustment values of the following items: Gamma, Brightness, Contrast, and Chroma.
ICM
Synchronized with the ICM Method of the Advanced settings (ICM Handled by Host System). If this check box is selected, the driver manages colors.
ICM & Driver
If this check box is selected, ICM (color management) and the 2.2.5 Color Adjustment are enabled.

Language
Change the display language for the following items: Advanced options-Printer functions, Option, Color Adjustment, and Printer Info.
The selected language is enabled the next time the print settings are displayed.

[Available languages]
- Japanese
- English (US)
- French (France)
- German (Germany)
- Russian (Russia)
- Spanish (Spain)
- Korean
- Chinese (People's Republic of China)
- Chinese (Taiwan)

- When your operating system environment corresponds with one of the above settings, the default display language is the language of the corresponding country.
Furthermore, when your operating system environment does not correspond with one of the above settings, the default display language is English.

- To use a language different from that of your operating system, you must install the following font for the corresponding language.

<table>
<thead>
<tr>

About
Show the driver version.
2.2.5 Color Adjustment

If the Handled by Driver check box is selected in the 2.2.4 Option, the adjustment values of the Color Adjustment tab are applied to the image.

The following section shows the setting ranges on the Color Adjustment tab.

<table>
<thead>
<tr>
<th>Adjustment item</th>
<th>Adjustment value</th>
</tr>
</thead>
</table>
| **Gamma**       | -100 (dark) to 100 (bright) (*0* results in no adjustment, γ2.0 to 0.5)  
|                 | Adjust the density of the half-tone section of the image. Increasing the gamma value brightens the half-tone section.  
|                 | Sync check box  
|                 | ON: Set RGB to same value.  
|                 | OFF: Set RGB to different value. |
| **Brightness**  | -100 (dark) to 100 (bright) (*0* results in no adjustment)  
|                 | Adjust the brightness of the image. Increasing the brightness value brightens the entire image.  
|                 | Sync check box  
|                 | ON: Set RGB to same value.  
|                 | OFF: Set RGB to different value. |
| **Contrast**    | -100 (weak) to 100 (strong) (*0* results in no adjustment)  
|                 | Adjust the contrast of the image. Increasing the contrast value increases the difference of brightness and darkness.  
|                 | Sync check box  
|                 | ON: Set RGB to same value.  
|                 | OFF: Set RGB to different value. |
| **Chroma**      | -100 (weak) to 100 (strong) (*0* results in no adjustment)  
|                 | Adjust the chroma of the image. |

2.3 Default values for settings

The following section shows the default values of the settings (at installation). If the settings have been changed, and the printer driver no longer operates normally, return to the default values shown below.

Note) Depending on the service pack of your operating system or your usage environment, the default values at installation may differ from those in the chart below.

</table>

*1: For the initial values of paper sizes, see “2.2.2 Advanced options”.
2.4 Color management

Use Color management to specify the color profile. The installer associates "SD_DS820_0010.icc" and "PP_DS820_0010.icc" by default.

This printer driver automatically changes the color profile for the media that is loaded in the printer.

To use an ICC profile other than the default profile, overwrite the ICC profile that has been registered as the default.

For the ICC profile to overwrite, prefix “SD_” to the profile name for Digital media and prefix “PP_” to the profile name for Pure Premium media.

Example: Overwritten profile name
- For Digital : SD_xxxxxxxxx.icc
- For Pure Premium : PP_xxxxxxxxx.icc

**Step 1.** From the Printer Properties, select the Color Management tab, and then click “Color Management...”.

**Step 2.** From Device, select DP-DS820.
### 2.5 Print Area

The following section shows the image sizes and numbers of dots generated by the paper size setting of the driver.

<table>
<thead>
<tr>
<th>Paper size</th>
<th>Image size (width x height)</th>

Chapter 3  Update the driver

As when performing the installation, log in as an administrator before carrying out this operation.

1. Check the job

1) Before updating the printer driver, close all applications. Furthermore, click on the icon of the printer to be updated in the Devices and Printers screen. At the bottom area of the screen, confirm that there are no documents in the queue, and then start update of the driver.

Note: In Windows 8 and 10, when the printer is offline (the printer is not on and connected), the DP-DS820 icon is not displayed. Always connect the printer with the power turned on and check that there are no documents in the queue.

Figure 3.1 Clicking the DP-DS820 icon at the Devices and Printers screen
2. Uninstall the driver package

1) Click "Start", and then click "Control Panel". In the Control Panel, click "Uninstall a program".

   In Windows 8, right click the Start screen. In the bottom right area, select "All Apps", and then select "Control Panel". In the Control Panel, click "Uninstall a program".

   In Windows 10, right click the Start., and then click "Control Panel". In the Control Panel, click "Uninstall a program".

   ![Figure 3.2 Control Panel](image)

   2) The Uninstall or change a program screen appears. In the list, double click “Dai Nippon Printing DP-DS820”.

   ![Figure 3.3 Uninstall a program](image)
3) Click “Yes” when the Dai Nippon Printing DP-DS820 uninstall confirmation windows appears. Uninstalling the driver is complete. After uninstalling the printer package, restart the computer.

![Uninstallation confirmation](image)

Figure 3.4 Uninstallation confirmation

When a User Account Control dialog box appears, click Yes.

![User Account Control](image)

Figure 3.5 User Account Control

3. Install an upgrade for the printer driver

After deleting the printer and the printer driver, install the new printer driver. For the installation procedure, see “Chapter 1 Installation”.

4. Restart the computer

After the installation of the printer driver is complete, always restart the computer. (Do not print just after installation. Always restart the computer once.)
Chapter 4  Delete the driver

4.1 Automatic deletion of printer drivers

The printer driver is automatically deleted when uninstalling the driver package. For the steps to uninstall the driver package, see “2. Uninstall the driver package” in Chapter 3.

Note that uninstalling the driver package when the printer driver is in use will display the following message, and the printer driver will not be deleted.

![Figure 4.1 Message displayed when the driver is in use](image)

When the above message is displayed, restart the computer and then delete the printer driver using the procedure described in “4.2 Manual deletion of printer drivers”.

4.2 Manual deletion of printer drivers

1) Click “Start”, and then click "Control Panel". In Control Panel, click "Devices and Printers".

From the Devices and Printers screen, right click the DP-DS820 printer. From the menu, click "Remove device".

In Windows 8, right click the Start screen. In the bottom right area, select "All Apps", and then select "Control Panel". In the Control Panel, click "Devices and Printers".

In Windows 10, right click the Start. In the bottom right area, select "All Apps", and then select "Control Panel". In the Control Panel, click "Devices and Printers".

Figure 4.2.1 Right clicking DP-DS820 in the Devices and Printers screen
In Windows 8 and 10, when the printer is offline (the printer is not on and connected), the DP-DS820 icon is not displayed. In such cases, use the following procedure to delete the device.

(i) On an empty area in the Devices and Printers screen, right click, and then select “Device Manager”.

(ii) Click View, and then select “Show hidden devices”.

(iii) Under Printers, right click DP-DS820, and then select “Uninstall”.

(iv) At the Confirm Device Uninstall screen, click OK.
2) The printer deletion confirmation dialog box appears. Click Yes.

![Printer deletion confirmation dialog box](image)

Figure 4.2.3 Printer deletion confirmation dialog box

3) After deleting the DP-DS820 printer, select another printer (for example, Fax), and then click "Print Server Properties" in the menu bar.

![Displaying the Print Server Properties menu](image)

Figure 4.2.4 Displaying the Print Server Properties menu in the Devices and Printers screen
4) The Print Server Properties dialog box appears. Click the Drivers tab. From the installed printer driver list, select DP-DS820, and then click “Remove...”.

![Figure 4.2.5 Printer Server Properties dialog box](image)

Figure 4.2.5 Printer Server Properties dialog box

5) The Remove Driver and Package dialog box appears. Select “Remove driver only”, and then click OK.

![Figure 4.2.6 Remove Driver And Package dialog box](image)

Figure 4.2.6 Remove Driver And Package dialog box
6) The Print Server Properties confirmation dialog box appears. Click Yes.

![Driver deletion confirmation dialog box](image)

Figure 4.2.7 Driver deletion confirmation dialog box

If the following message appears, the operating system may be using the driver (Print Spooler service) in the background.

Disconnect the USB cable and then restart your computer and try deleting the printer driver again.

![Driver in use](image)

Figure 4.2.7 Driver in use

7) In the Print Server Properties dialog box, confirm that DP-DS820 was deleted, and then click Close.

![Print Server Properties](image)
