Chapter 1  Install

Installation Flow
Installation is done in the following 3 steps.
Details of each step are shown in a subsequent page.

STEP 1  Prepare the printer and computer  --> "1.1 Printer and Host computer Preparation"

Do not connect the USB cable at this step.

STEP 2  Install the driver package  --> "1.2 Installing the Driver Package"

Insert the accessory CD into the disk drive and install the driver package.

STEP 3  Install the printer driver  --> "1.3 Installing the Printer Driver"

Connect the USB cable, turn the printer power ON, and install the printer driver.
After installation is complete, reboot the computer.
1.1  Printer and Host computer Preparation

Check that the power for the DS-RX1 printer is OFF.
Have a USB cable ready.  But do not connect the printer to the computer with the USB cable at this point.

In order to install the driver, login with administrator right. The following explanations are given on the assumption of use with administrator rights.

1.2  Installing the Driver Package

Insert the accessory CD into the disk drive.
Start Explorer, and click on the corresponding drive.
(If the AutoPlay function is on, select “Open folder to view files - using Windows Explorer”.)
(In Windows 8 and 10 if the AutoPlay function is on, click on the message of “Tap to choose what happens with this disc.”, then select “Open folder to view files File Explorer”.)

Select the following folders from the accessory CD. *Be sure to select the folder that matches your environment.

- Windows 7  … Drive of CD:\DS-RX1_Driver\English\7
- Windows 8 … Drive of CD:\DS-RX1_Driver\English\8
- Windows 10 … Drive of CD:\DS-RX1_Driver\English\10

![Driver Package Folder](image)

Fig 1.1  Driver Package Folder
In the selected folder, double click on the file “DriverInstall.CMD”. (Depending on your operating environment, the .CMD extension may not be shown.) The best Driver Package Installer for your operating system (32 or 64 bit) will automatically be selected.

If the User Account Control dialog appears, click on “Yes”.

![Fig 1.2 Install File](image)

![Fig 1.3 User Account Control](image)
When the “Welcome to the Device Driver Installation Wizard!” window appears, click on “Next>”.

![Starting of Installation Wizard](image1.jpg)

**Fig 1.4  Starting of Installation Wizard**

If the Windows Security confirmation window appears, click on “Install”.

![Windows Security confirmation](image2.jpg)

**Fig 1.5  Windows Security confirmation**

This starts the Driver Package installation. Please wait until it is complete.

When the “Completing the Device Driver Installation Wizard” window appears, click on “Finish”.

![Completion of the Installation Wizard](image3.jpg)

**Fig 1.6  Completion of the Installation Wizard**
1.3 Installing the Printer Driver

Connect the printer to the computer with the USB cable, and turn the printer power ON.
The printer will be recognized, and the driver installation should begin.
* Please refer to the manual for the DS-RX1 printer for connection if needed.

When driver installation begins, the message “Installing device driver software” will appear above the task bar.
The message will not appear in Windows 8 and 10. Please turn to page 7.

By clicking on this message, the “Driver Software Installation” window will be opened, and the driver installation status will be shown. Click on “Close” to close the window.

* About “Skip obtaining driver software from Windows Update”
If the operating system setting is such that it will get the driver software from Windows Update, it will first search for the driver through Windows Update, so it will take more time to complete the installation. If you skip getting the driver software through Windows Update, the time to complete the installation will be decreased (Depending on the environment, it may take some time to complete the installation).
Click on “Skip obtaining driver software from Windows Update” in the “Driver Software Installation” window.
When the confirmation window appears, click on “Yes”.

![Fig 1.10  Skip getting the driver software from Windows Update](image)

From a beginning of installation after a while, the message “Your device is ready to use” will appear above the task bar, and the printer driver installation will be complete.

![Fig 1.11  Driver Installation Complete message](image)

By clicking on this message, the “Driver Software Installation” window will be opened, and “Your device is ready to use” will be shown. Click on “Close” to close the window. (If the “Driver Software Installation” window is shown from the start of installation, the message above will not be shown.)

![Fig 1.12  Driver Software installation complete](image)
Select “Start”, then “Control Panel”, and open the control panel.
In Windows 8, right click the Start screen, select right-under the “All apps” and select the control panel.
In Windows 10, right click the Start, and then click “Control Panel” to open the Control Panel.
Click on “View devices and printers” in the control panel.

Check that the DS-RX1 is shown in the Devices and Printers window.
Note: In Windows 8 and 10, DS-RX1 icon does not appear if the printer is offline (if the printer with the power on is not connected).
Now, installation of the DS-RX1 printer driver is complete.
If the DS-RX1 printer driver installation was unsuccessful, the message “Device driver software was not successfully installed” will appear above the task bar.

By clicking on this message, the “Driver Software Installation” window will be opened, and the message “Device driver software was not successfully installed” will appear. Click on the “Close” button.

(If the “Driver Software Installation” window is shown from the start of installation, the message above will not be shown.)

If the driver installation was unsuccessful, refer to the next section “1.4 Installing a Driver for an Unspecified Device” and install the printer driver.
1.4 Installing a Driver for an Unspecified Device

Before installing the driver package, connect the printer (with power ON) to the computer, to create an “Unspecified” device in the “Devices and Printers” window. Using this method, the printer driver can be installed as follows. Also, when a driver is not installed correctly but the “Unspecified” device is created by the method of connecting a printer after installing the driver package of usual printer driver installation procedure, you can install the driver using the following method.

1. Installing the Driver Package

If the driver package has not been installed yet, follow the procedure shown in “1.2 Installing the Driver Package”. When the driver package has been installed, installation of the printer driver for the Unspecified device may be completed automatically.

2. Installing a driver for an Unspecified device

In the “Unspecified” device of the “Devices and Printers” window, do the right click of the "Photo Printer", and click on the “Troubleshoot” from pull-down menu.

![Photo Printer as an unspecified device](image-url)
When the “Install a driver for this device” window appears, click on “Apply this fix”. It will automatically search for the driver and installation is started.

![Fig 1.18  Applying the Fix](image)

When the driver has been installed, “Troubleshooting has completed” will appear. Click on “Close the troubleshooter” to end the troubleshooting.

![Fig 1.19  Completion of Troubleshooting](image)
Check that the DS-RX1 is displayed in the “Devices and Printers” window.

Note: In Windows 8 and 10, DS-RX1 icon does not appear if the printer is offline (if the printer with the power on is not connected).

Now, the DS-RX1 Printer Driver installation is complete.

After installation of the printer-driver is complete, be sure to reboot the computer.
Chapter 2  Properties

Various printer settings can be made using the DS-RX1 Driver properties. Before operation, be sure to have a good understanding of the contents. Login by administrator authority is required for operation. Depending on application of the use, operation from print setting of the application is necessary.

2.1 Opening Printer Properties

1. Click Start => Control Panel => open the control panel
   In Windows 8, Right click on the Start screen => All apps => Control Panel => open the control panel
   In Windows 10, right click the Start, and then click “Control Panel” to open the Control Panel.

2. In the control panel, select View devices and printers => open the Devices and Printers window
3. Right click on the DS-RX1 icon, and from the pull-down menu select Printer properties => open the Properties window.

Note: In Windows 8 and 10, DS-RX1 icon does not appear if the printer is offline (if the printer with the power on is not connected).

4. The DS-RX1 Properties window will appear.
2.2 **Explanation of Print Setting Functions**

From the Properties window, by selecting Preferences you can make various print settings.

### 2.2.1 Layout

![Layout tab](image)

**Orientation**

Assign print orientation as Landscape or Portrait. Refer to 2.6 Print direction.

**Page Order**

When printing multiple images in the application, you can set the order.

Ex.) Print order

<table>
<thead>
<tr>
<th>In order</th>
<th>Reverse order</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="No.1" /></td>
<td><img src="image" alt="No.2" /></td>
</tr>
<tr>
<td><img src="image" alt="No.3" /></td>
<td></td>
</tr>
</tbody>
</table>

**Pages per Sheet**

Prints the designated fractional size. Normally you should specify a value of 1.

(If you want to specify other than 1, please use the Print Quality settings to 300x300dpi or 600x600dpi)

Ex.) Fractional size

<table>
<thead>
<tr>
<th>1 (Whole)</th>
<th>4 (Quarter-size)</th>
<th>9 (One-ninth size)</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="1" /></td>
<td><img src="image" alt="4" /></td>
<td><img src="image" alt="9" /></td>
</tr>
</tbody>
</table>
2.2.2  Advanced Options

By selecting [Advanced] in the Layout window, various settings can be made using Advanced Options.

![Fig 2.2.2.1 Advanced Settings](image)

![Fig 2.2.2.2 Advanced Options tab](image)

**Paper Size**
You can designate the paper size. Please match the paper size to the media size with which the printer is equipped.

**Copy Count**
You can designate the number of times an image will be printed.

**Print Quality**
You can designate the print quality.

<table>
<thead>
<tr>
<th>Print Quality</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>300 x 300dpi</td>
<td>Printing in the high-speed mode</td>

</tr>
<tr>
<td>600 x 600dpi</td>
<td>Printing in the high-quality mode</td>
</tr>
</tbody>
</table>

*If the application cannot set an asymmetric aspect resolution, please set the 600x600dpi.*
*When you execute the "Print Test Page" in printer properties in Windows 8 and 10, depending on the specifications of the OS, is printed the aspect ratio of the printer mark is different.

**ICM Method**

<table>
<thead>
<tr>
<th>ICM Method</th>

</tr>
</tbody>
</table>
| ICM Handled by Printer      | This is the same as setting “ICM Handled by Host System”.

**ICM Intent**
This designates the rendering method when using ICM. Always have the ICC profile for the DS-RX1 set to “Picture”. Please do not use it at other settings.

**Advanced Printing Features**
Always have it set to “Enabled”. Please do not use it at other settings.

**Pages per Sheet Layout**
The layout direction of a picture is specified, when Pages per Sheet setting is multiple pages per sheet.
Border
Synchronous with the border option in the paper option.

Overcoat Finish
The overcoat finish for the printed surface can be selected from the following two types.

<table>
<thead>
<tr>
<th>Overcoat Finish</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glossy</td>
<td>This finishes the print with a glossy surface.</td>
</tr>
<tr>

<td>This finishes the print with a matte (non-glossy) surface.</td>
</tr>
</tbody>
</table>

Print Re-try
This sets up whether print data in a printer buffer when the error of a printer occurs is printed after error recovery, or it does not print.

<table>
<thead>
<tr>
<th>Print Re-try</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

According to the contents of a printer error, the power supply of a printer needs to be re-switched on for error recovery. In this case, it is not dependent on a setup of Print Re-try, and printing data in a printer buffer is cleared. Operation by Print Re-try setup in each error is shown below.

*1: After an error stop, a paper or a ribbon should perform removal work of an error factor according to a printer user's manual.

2inch cut (Depending on the version of printer firmware being used, “Disable” may be the only option.)
In the case of the specific paper size, it sets up whether it cuts into two or more sheets by the length of 2 inches.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
<Multiple layout>

When the DS-RX1 is using 6x8 size media, 2 image layout is possible.

With the printer driver paper setting, multi-image layout is made possible, and the image sizes are as follows.

<table>
<thead>
<tr>
<th>Layout designation</th>
<th>Driver paper setting (layout)</th>
<th>Paper Orientation</th>
<th>Image size width x height (mm)</th>
<th>Using media</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>

<td></td>
</tr>
<tr>
<td></td>
<td>Image layout median size</td>
<td></td>
<td>2.54</td>
<td></td>
</tr>
</tbody>
</table>

Multiple layout is possible under the following conditions.
1. The printer is using 6x8 size media.
2. The printer driver paper size is set to one of the above sizes.
3. Multiple images are sent from the application.

Note) Because the multi-image layout occurs on a per job basis, this works when there are multiple images for 1 job. If you want to print the same image, be sure to send the image data for each copy to be printed. The printer prints 2 images in one operation, and the paper is cut as it is fed out.

<Multi-image layout patterns>

The following is possible for the multi-image layout pattern.

![Multi-image layout patterns](image_url)
<Example of Application Use>
This is an example using Windows Explorer

Step 1. Select 2 or more images=>Click “Print”.

Step 2. Check “Fit picture to frame” and click “Options”.

Step 3. Click on “Printer Properties”.

Step 4. From the “Orientation” pull-down menu, select “Portrait”.

Step 5. Click on “Advanced”.

Step 6. Set the Paper Size to “(6x4)x2”. Then click “OK” on the windows from steps 6=>5, returning to the window displayed in Step 2.

Step 7. Click on “Print”.

- **Color**
  - Please set to color print. Do not use for black and white printing.

2.2.4 Option

![Paper option tab](Fig 2.2.4.1 Paper option tab)  ![Sharpness setting](Fig 2.2.4.2 Sharpness setting)

- **Border**
  - Designates yes or no for border (check means with border). Synchronous with border in the Advanced Settings.

- **Sharpness**
  - Processes for 11 sharpness levels (Fig 2.2.4.2). 0 (initial setting) means there is no sharpness processing. Minus(-) blurs the image, and plus(+) increases the sharpness.

- **Color Adjustment**
  - **None**
    - Synchronous with the ICM Method in the Advanced Settings. Checking this item disables ICM and the Color Adjustment tab, and color management does not occur from the driver.

  - **Handled by Driver**
    - Checking this item disables ICM and **2.2.5 Color Adjustment** is enabled. The adjustment values for gamma, brightness, contrast, and chroma are shown.

  - **ICM**
    - Synchronous with the ICM Method in the Advanced Settings (ICM Handled by Host System). Checking this item enables color management from the driver.

  - **ICM & Driver**
    - If you check this, ICM (color management) and color adjustment will be enabled.

- **About**
  - Displays the driver version.
2.2.5 Color Adjustment

2.6 Print Direction

Regarding the print direction setting, the relationship between the application-generated image and the print (feed direction) is as shown in the following chart. The generated image is the image generated through enlargement/reduction to fit the size shown in 2.5 Print Area, without having the application rotate the original image.

Chapter 3  Updating the Driver

In order to update the printer driver, follow the steps shown below.

1. Driver Removal

(1) Before removing the printer-driver, shut down all other applications. Also, in the “Devices and Printers” window, select the printer icon of the printer you want to remove, check the bottom of the window that there are no documents in queue, and start removal of the driver.

Note: In Windows 8 and 10, DS-RX1 icon does not appear if the printer is offline (if the printer with the power on is not connected).

If you can not connect to the printer with the power on, remove the device in the procedure on the next page.

(2) Select “Start”→“Control Panel”, and click on “View devices and printers” in the control panel.

In Windows 8, right click on the Start screen, select the right-under "All apps", select "Control Panel", click on “View devices and printers” in the Control Panel.

In Windows 10, right click the Start. In the bottom right area, select "All Apps", and then select "Control Panel". In the Control Panel, click "Devices and Printers".

From the “Devices and Printers” window, select the DS-RX1 printer, display the pull-down menu with the right click, and click on “Remove device”.

2. Uninstalling a Driver Package

(1) Select “Start”, then “Control Panel”, and open the control panel. Click on “Uninstall a program” in the control panel.
In Windows 8, right click on the Start screen, select the right-under “All apps”, select “Control Panel”, click on “Uninstall a program” in the Control Panel.
In Windows 10, right click the Start, and then click “Control Panel”. In the Control Panel, click “Uninstall a program”.

(2) When the “Uninstall or change a program” window appears, double-click on “Windows Driver Package – Dai Nippon Printing DS-RX1 (mm/dd/yyyy x.x.x.x)” (mm/dd/yyyy = the date, x.x.x.x = the version).
(3) When the “Uninstall Driver Package” window appears, click on “Yes”.
The Uninstall will be completed.
After finished with uninstalling the driver package, reboot the computer.
