Overview

The 2-inch cut feature on the DS40 and RX1 will cut a 4x6 print into two 2x6 prints. This is typically used in photobooth applications. Enabling 2 inch cuts on a Mac requires the use of CUPS, or *Common UNIX Printer Service*. CUPS is a web-based application that simplifies printer management interface. CUPS is part of OS X.

Enabling CUPS

- 1. Open Terminal.
 - a. Click Go on the Finder menu.
 - b. Click Utilities.
 - c. Select Terminal.
