THE SIMPLE WAY TO
MANAGE PHOTO PRINTING!

hot Folder Print Utility

by DNP

Hot Folder Print (HFP) acts as an integration tool allowing software developers an easy method to integrate DNP printers!

Multiple Printers

HFP's software interface provides full control of the DNP printer setting for easy photo printing. Connect up to 4 printers – DS620A, DS40, DS80, DS80DX, DS-RX1HS – for simultaneous printing and print job spanning between like printers.

Easy Integration

HFP is an easy-to-use software utility for printing images with any DNP printer. HFP acts as an integration tool for software developers. The improved GUI offers updated dashboard view, customizable low media warning, and color profiles.

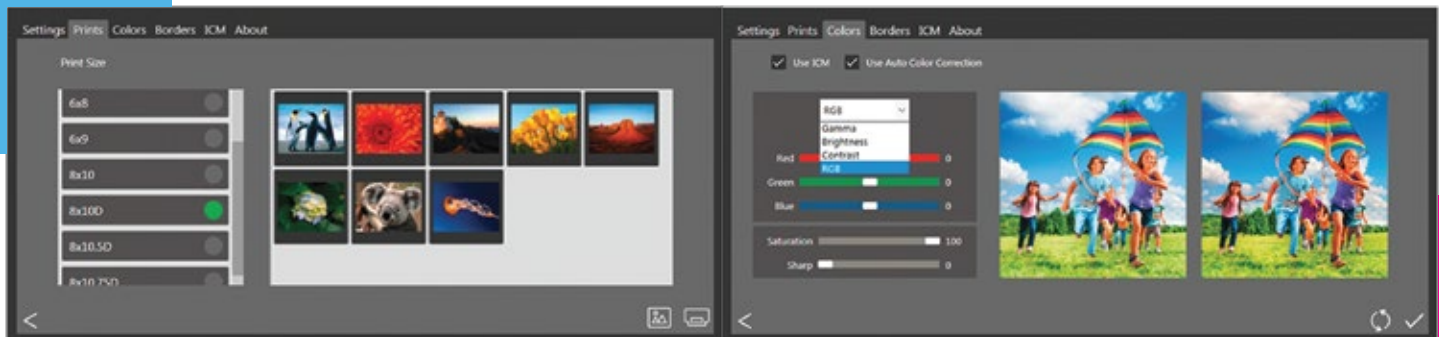

Color Control

HFP allows users to control color settings including Auto correction, RGB, Gamma, Brightness, Contrast, Saturation, and Sharpness. Utilize individual channel control or move channels together. Quickly revert to neutral settings.

Multiple Languages

The modern and easy-to-navigate GUI has expanded language support including English, French (Canada), Spanish (Latin America), and Portuguese (Brazil). Multiple languages are also supported in HFP's menus, dashboards, and color profiles.

Specifications:
