Hot Folder Print v2.5.3

PN: DOC-I-HFP-R01 REV: 04.30.2020 Hot Folder Print[™] allows you to easily load, edit, and print images from your PC. Load your images into the software using an easy drag-and-drop method. Then simply print the photos. While you're printing, use HFP to monitor your DNP printer status. You can also print images in a specific order, change the print quantity, and add borders!

Dur with your DNP printers & is available in multiple l. languages.

HFP works exclusively

INSTALLING THE SOFTWARE

- 1. Download the installation files from our website: www.dnpphoto.com. The installation files are downloaded in a compressed (or ZIP) folder to save download space and time.
- Extract (unzip) the installation files to a location you can easily find on your computer. (The downloads folder or desktop are two easy-to-remember locations). There are three files in your installation package: the installation file (.exe), and two PDF documents—an installation guide and a user guide.
- 3. Find your .exe file labeled HFPUtilitySetupx.x.x.exe and double-click to begin the installation. (Where x.x.x.x is the version number for the software.)
- 4. A window may open asking if you are sure you want to run the software. Click **Run** to proceed.
- 5. Sometimes a Windows User Account Control pop-up window appears asking you if you want to allow the program to make changes to the computer. Click on **Yes** to continue.
- 6. When the language prompt appears, select the language you want to install and press the **OK** button to continue.
