Updating the Firmware

You can update the unit's firmware.
For information on the latest firmware, visit the DS-ID400 support site (http://www.dnpphoto.com/drivers/).

1 Save the firmware update to an SD card or USB memory device.

2 Press the **MENU** button

3 Press ▼ on the control button to display [SYSTEM] on the LCD display

4 Press ►
[SYSTEM SETTINGS] appears

5 Press ►

6 Press ▼ to display [FIRMWARE UPDATE].

7 Press ►
[INSERT MEMORY CARD] appears

8 Insert the SD card or USB memory device on which the firmware update is saved.

9 Verify the firmware update version, and press the **EXEC** button.

Updating begins, and [NOW UPDATING] appears on the LCD display.

When updating is finished, the unit restarts.

Note

Do not turn off the unit while updating is in progress.
