

Terrell Lloyd, San Francisco 49ers Photographer, Brings DNP's DS40™ to the Football Field and Around the World

From the new Levi's Stadium in Santa Clara to places across the globe, Terrell Lloyd relies on DNP's flagship DS40 for flawless prints anywhere, any time.

After 17 years photographing the San Francisco 49ers, pro photographer Terrell Lloyd transitioned in July 2014 from contractor to a full-time team employee for the 49ers. Lloyd is now the head team photographer working under 49ers Studios and oversees all game-day photography, marketing shoots, community relations programs, as well as providing services for the 49ers ownership. While his responsibilities vary from day-to-day, his use of DNP's DS40 for most of the team's photo printing needs when it requires a in-house or on-site printing. For Lloyd, what really sets the DNP DS40 apart is that it works as hard as he does—portraying each and every image with sharp lines and bright colors.

"I've worked with many photo printers throughout my 20 years in the photography business, so I know a high-end print when I see one," said Lloyd. "The quality of the DNP DS40 is above and beyond the rest."

Speed is also crucial to Lloyd's work, and the DS40 delivers top quality photographs in just seconds. "Clients are always amazed not only by the quality of the prints I hand to them but also the speed in which they are produced," Lloyd explained. "The DS40 allows people to walk away from an important event with a tangible memory right then and there."

In addition to his work with the 49ers, Lloyd is an athletic photographer for San Jose State University, and shoots high-end corporate events for companies around the world where he continues to rely steadfastly on the DS40. "The portability of the printer and the size of the printer make traveling with it easy," Lloyd said. "Reliability is key, and the DS40 is the most reliable printer out there. And people are amazed by the quality of print you can produce, no matter where in the world we are."

Lloyd currently owns two DS40 printers and plans to expand in the upcoming months.
