DNP Announces Immediate Availability of WPS-1 Wireless Print Server

CONCORD, North Carolina — DNP Imagingcomm America Corporation today announced its new WPS-1 Wireless Print Server for DNP Photo Printers is now shipping. The WPS-1 supports direct printing from Wi-Fi enabled photo capture devices, mobile devices and PCs to DNP's DS and RX Series of professional dye-sublimation photo printers. Ideal for professional on-demand printing services or a self-serving printing solution, the WPS-1 can be easily integrated with Photobooths, onsite event photos, or small retail photo printing solutions.

“Since announcing the WPS-1 Wireless Print Server at WPPI 2015, we’ve received a tremendous amount of positive feedback from photographers and other photo providers looking forward to integrating wireless printing functionality with their workflows,” said Katsuyuki Oshima, President of DNP Imagingcomm America Corporation. “We designed the WPS-1 with a broad range of markets in mind. From the professional event photographer to the mobile event photo operator and small retailer, the WPS-1 will be an invaluable asset for increasing workflow productivity, flexibility and profitability.”

The WPS-1 is designed exclusively for DNP’s award-winning DS40, DS80, RX1 and DS620A printers. The set-top box runs custom DNP software that eliminates typical PC and network router requirements while supporting multiple image input methods. Using its built-in 802.11b/g/n Wi-Fi access point, the unit supports printing from multiple Wi-Fi enabled DSLR cameras, iOS phones, Android phones and Android-based cameras, as well as printing from Windows or Mac computers. It also allows users to select and print groups of photos using tablets running iOS, Android, or Windows. The DNP apps for the WPS-1 can be found at the online Android and iOS Marketplaces.

Ideal for professional on-demand printing services or a self-service printing solution, the WPS-1 can connect to two identical DNP photo printer models for speed/redundancy or connect to two different models for an increased range of print size options. The device allows for multiple print sizes including 4x6”, 5x7”, 6x8”, and 8x10”, depending on the combination of printers and media. All prints are available with operator configurable glossy and matte finishes and can be produced with custom borders as well.

The WPS-1 is currently available at resellers across the United States, Canada and planned for release in Latin America in the near future.

About Imagingcomm America Corporation (IAM)

IAM is a 100 percent U.S. subsidiary of Dai Nippon Printing Co., Ltd. (DNP) – the world's largest manufacturer of dye-sublimation media for photo printers and thermal transfer ribbons and barcode printers.

DNP Imagingcomm America Corporation has the broadest selection of solutions for the photo retail market and products designed to address retailer's specific business goals and objectives—backed by the quality and reliability today's customers expect. Manufacturing, sales and development offices of dye-sublimation media for photo printers is located in Concord, N.C., and more information is available at www.dnpimagingcomm.com.

About DNP

Imaging Communications Operations is one of many of DNP's operations. Over 25 years ago, DNP was one of the first organizations to pioneer dye-sublimation media -- and the oldest company to start business development in thermal transfer ribbons. DNP has since grown to be the world's largest manufacturer of dye-sublimation media and thermal transfer ribbons.

DNP group is also the world's largest diversified printing/coating technologies company. At its 71 production plants, both in Japan and overseas, DNP's operations include commercial printing, packaging, decorative materials, electronics, business forms and information media supplies. DNP is a global corporation with \$15.4 billion* in annual revenue. For more information, please visit www.dnp.co.jp/eng
