DNP Features DS620A™ Dye-Sublimation Photo Printer at WPPI 2017

WPPI (Booth #549), Las Vegas – DNP Imagingcomm America Corporation (DNP IAM) will be showcasing its flagship DS620A dye-sublimation professional photo printer at WPPI 2017. Part of DNP's award-winning line of DS Series printers, the DS620A is the world's most compact professional-grade photo printer capable of producing up to 400 prints per hour. Perfect for weddings and other events, the DS620A is a highly profitable solution for event photographers who want to provide instant custom photo souvenirs.

"With its wide range of print size options, quick output, and innovative print technology, the DS620A is a revenue-generating asset for photographers printing on-site," said Katsuyuki Oshima, President of DNP Imagingcomm America Corporation. "The DS620A represents our continued commitment to providing the wedding and event photography markets with the most reliable and cost-effective printing solutions available as well as our dedication to preserving the memories of their customers."

At only 10.8-inches wide by 14.4-inches deep by 6.7-inches high, the DS620A is 14 percent smaller and lighter than its predecessor. The small footprint allows for easy transportation and stacking with additional printers for high output functionality making it the ideal companion for attractions and photographers searching for mobility, speed, and volume.

The DS620A is capable of producing a wide range of print sizes - from 2x6" photo strips, 4x6" photographs and 6x6" square prints, to beautiful 6x20" panoramic* prints in newly improved gloss, matte, or luster finishes. The printer is not only versatile, but it also boasts a 14 percent increase in image throughput per hour for some of the fastest print speeds available—standard 4x6" images are produced in less than nine seconds, while 6x8" are printed in about 16 seconds. The printed media also features a new DNP watermark on the backside of each photo.

Environmentally friendly, both energy consumption and media waste have been optimized in the DS620A. A new standby mode lowers costs by making the most efficient use of energy (<0.5W). The printer also provides advanced status information from the driver, enabling users at any time to check remaining media, media format, printer status, printer life counter, color control data, firmware version, and serial number.

The DS620A is compatible with DNP's vast range of software products, including the Tomo kiosk software, Nexlab® order management software, and the new print utility software Hot Folder Print for enhanced print workflows. DS620A printer drivers are available for Windows 7, 8, and 10**. Mac OS-X Driver are available for 10.9, 10.10, and 10.11.

For more information on DNP's professional photo printing solutions, please visit:
www.dnpphoto.com.

**Panoramic feature available on DS620A by downloading the latest firmware v1.41 and installing Hot Folder Print 2.2.*

***Driver for Windows 8 is tested compatible with Windows 10.*

About Imagingcomm America Corporation (IAM)

IAM is a 100 percent U.S. subsidiary of Dai Nippon Printing Co., Ltd. (DNP) – the world's largest manufacturer of dye-sublimation media for photo printers and thermal transfer ribbons and barcode printers.

DNP Imagingcomm America Corporation has the broadest selection of solutions for the photo retail market and products designed to address retailer's specific business goals and objectives—backed by the quality and reliability today's customers expect. Manufacturing, sales and development offices of dye-sublimation media for photo printers is located in Concord, NC, and more information is available at www.dnpphoto.com.

About DNP

DNP, founded in 1876, is the world's largest diversified printing/coating technologies company. At its 70 production plants, both in Japan and overseas, DNP's operations include commercial printing, packaging, decorative materials, electronics, business forms, and imaging products.

Over 25 years ago, DNP was one of the earliest organizations to pioneer dye-sublimation media—and the first company to start business development in thermal transfer ribbons. DNP has since grown to be the world's largest manufacturer of dye-sublimation media and thermal transfer ribbons. For more information, please visit www.dnp.co.jp/eng.
