

MDRN Photobooth Company Amplifies Brands and the Guest Experience With Customized Photo and Video Activations

MDRN Photobooth Company elevates corporate events through customized photo and video experiences guests love to share. MDRN has pioneered and expanded the visual experimental marketing scene in Canada through expertly designed photo booth activations that make events, brands, and experiences memorable.

Founder and Creative Director of MDRN Photobooth Company, Catalina Bloch, has worked with her team since 2013 to grow the company into one of the largest photo and video activation companies in Canada. Working with some of the biggest name brands, the company has mastered delivering the perfect experience to every guest.

MDRN Photobooth Company offers a variety of different activations, including 360 videos, slow-motion videos, and custom-built booths for different occasions such as corporate events and weddings. The company offers additional services, including building a mosaic photo wall, professional photography, and virtual, digital, and print photobooths to make every event unique and truly customizable.

When offering prints at an event, the company trusts the DS40™ or DS620A™ dye-sublimation printers from DNP Imagingcomm America Corporation (DNP IAM) to produce stunning, high-quality photo prints guests will love.

“The first photo booth I ever purchased came with a DNP DS40, and I fell in love with it. Even now, whenever I see one go on-sale, I buy it,” said Bloch. “DNP printers are very reliable and deliver high-quality, beautifully colored prints very quickly, which is perfect for any type of event. Our company strives to provide guests with professional-looking photos, and DNP printers deliver that.”

The award-winning DNP DS40 is a powerful, dye-sublimation photo printer that is compact, affordable, and produces high-quality photos with impressive full-color details. The printer produces photos in 8.9 seconds that are smudge-free and remain vibrant over time. The DNP DS620A provides spectacular color quality photos, offers a wide selection of image sizes, including Panoramic printing up to 6"x20", and a variety of media including metallic, silver pearl luxury and perforated, making it the perfect printer for a professional photographer and any photo booth operation.

MDRN Photobooth Company always strives to enhance the guest experience by providing unique visual experimental marketing and photo memories guests can take back home with them to cherish for years to come.
