

Get Candid Shots From All of Your Guests!

-  **Live Slide Show**
-  **On-location Prints**
-  **Social Sharing**

More Fun and Engagement is Something You Can Sell

For years, guests attended events where disposable cameras were placed on tables, encouraging them to take candid photos of their friends and coworkers for the host to collect. Now there's something easier, more immediate and much more capable – your guests' cell phones working with the Party Print web service!

When you bring the Party Print system to your clients' events, it lets guests upload the photos they've taken and share them via a live feed, with other guests able to download full-resolution copies, get prints on location and see the photos displayed in a large-screen slide show. It's fast & easy – they just scan a QR code to go to the Party Print web app, select their best photos and click Send.

Party Print is an amazing value-add for nearly any event and a great way to increase your revenue. You can offer it to your clients for a fixed fee, bundle it with other services or you can charge for prints. It can even be combined with a photo booth so that photo booth images are included in the Party Print feed.

All you need to offer this service to your clients is a PC connected to a DNP printer, Internet connectivity at the event and, optionally, a large-screen display for the slide show. Everything else is web-based - you create and manage all Party Print events through a web browser from any PC or tablet.

Show Photos on a Big Screen and Print

Immediate gratification when guests share their photos

A Guest Web App That's Fast & Easy

Nothing to download. Includes a live feed of all guest photos

Cloud-based Setup and Management

You create and manage all events through a web browser

Easy and Flexible

- 

1. Photographer creates an event in Party Print planning website.
- 

2. Guests take photos during the event using their phones.
- 

3. Guests scan a QR code to go to the Party Print web app.
- 

4. Guests select the photos they want to share. Photos are sent to the cloud server.
- 

5. Party Print cloud sends photos to the event PC, which displays & prints.
