

## WPS<sup>®</sup> Pro Wireless Print Server

- DSLR shoot-to-print to any DNP Printer
- Print using phones and tablets
- Easy setup and flexible workflow
- Integrated into the most popular photo booth and mobile event printing apps.

## DSLR Shoot-to-Print

You can create fast, flexible shoot-to-print workflows using your favorite camera with WPS Pro and 3rd party applications like CamRanger® or CamFi®. These applications allow you to print immediately via WPS Pro, or you can review photos on your iPad before wirelessly printing groups of photos.

## Flexible Workflow

The flexible workflow and hardware arrangement makes the WPS Pro simple to configure and easy to use. Built-in versatility **supports up to two DNP printers** and image transfer via FTP services and printer sharing. Print amazing photos from 2x6" to 8x12".

## DNP Mobile Applications

Available for iPhone/iPad® and Android®, DNP applications let you quickly print from your mobile device as well as monitor the status of your DNP printers and WPS Pro.

Please refer to the WPS Pro Operation Manual for more complete details.

### WPS Print 2

Easily select images or shoot a photo, then choose size and print.

### WPS Status

See that your printer is online and check the number of prints remaining.

Print from gallery or take a photo with camera.

Choose print size, finish, and quantity. Only available print sizes will be shown, based on connected printer/printers.

## Great 3rd Party Application Support

Application developers are integrating WPS Pro into their solutions, creating wireless printing options for event photographers, photo booth operators, and other photo professionals. From standalone iPhone and Android apps to hardware/software solutions, WPS Pro brings new capabilities that add value for your business. And DNP is working to bring even more partner solutions to you.

### 3rd Party Applications include, but NOT limited to:

#### Wireless tether DSLR-to-tablet-to-WPS

- CamRanger® (iOS/Android)
- CamFi® (iOS/Android)

#### Photo booth app with integrated printing

- Picture Marketing® (iOS)
- WiFiBooth® (iOS)
- SLR Booth (Android)

#### Mobile device event capture/printing workflow

- Wi-Pics® (Android)
